## Укажите параметры экспорта

Пожалуйста укажите формат экспорта конфигураций.

**Открытый Формат Виртуализации** поддерживает только **ovf** или **ova** расширения. Если Вы используете расширение **ovf**, каждый файл будет записан отдельно. Если Вы используете расширение **ova**, все файлы будут скомбинированы в один архив Открытого Формата Виртуализации.

**Облачная Инфраструктура Oracle** поддерживает только экспорт на удалённые облачные серверы. Главный виртуальный диск каждой из выбранных машин будет выгружен на удалённый сервер.

Формат: Открытый формат виртуализации 2.0

Пожалуйста выберите имя файла для экспорта конфигурации. Кроме того, Вы можете задать определённое количество опций, влияющих на размер и содержимое конечного архива.

Файл: D:\VBox\ubuntu01\_Krupskiy.ova

Политика MAC-адреса: Включать только MAC-адреса сетевого адаптера NAT

Дополнительно: ☒ Создать Manifest-файл  
☐ Включить ISO файлы образов

Далее Отмена
